

Mental Health Goals

NATIONAL PROGRAMME

MHG Innovative Trials Hub

Innovative Trials Hub rationale

The UK has an outstanding academic clinical trials network

The UK has outstanding CROs supporting commercial trials

Neither are specifically linked into the MHG and wider UK data assets

**UK Registered
Clinical Trials Unit
Network**

Innovative Trials Hub aim

Strengthening mental health trial design and methodology in partnership with industry

ITH provides statistical and methodological expertise in the design and analysis of precision psychiatry studies, from early-phase biomarker-guided designs through adaptive Phase 2 and 3 trials — plus the infrastructure for multi-arm multi-stage platform studies delivered at scale in primary and community settings.

Meet the MHG Innovative Trials Hub

Prof. Richard Emsley
ITH Lead

Dr Danielle Edwards
Senior Research Fellow,
Late-phase trials lead

Senior Research Fellow,
Early-phase trials lead

Dr Kim Lee
Senior Research Fellow,
Platform Lead

Statistical regulatory lead

Zeynep Sahin-Lodge
ITH Co-ordinator

Innovative Trials Hub objectives

1. Support for individual studies
2. Infrastructure for platform trials
3. Trials methodology
4. Support for statistical liaison with regulators and NICE

MRC-NIHR Trials Methodology Research Partnership

Prof. Paula Williamson
TMRP Lead

Small project awards scheme about to launch

Brings together TMRP experts to work on key challenges

Previous work included estimands, N-of-1 designs, PPiE, recruitment and retention...
